

JAY-LOR

MINI FEED MIXERS

from 7.8m to 10.6m

INTRODUCING THE 5275, A MINI-MIXER THAT CAN PROCESS 4'X5' BALES.

The New 5275 Mini-Mixer has been specifically designed to process bales up to 4'x5' into a uniform TMR that resists sorting. At only 79" tall, even the smallest skid steers won't have any trouble loading this 275 cubic foot (7.8m³) model and just 45 Horsepower will run it. We've used our decades of experience building larger TMR mixers to engineer the same capabilities and durability into this model. The 5275 is equipped with our patented Square-Cut augers which consistently produce a uniform Total Mixed Ration with optimum shaker box results. So why, you might ask? Because Nutrition Matters.
